

COLOUR COMPARISON TABLE FOR LAMINATES

How To Use Table

1. Select colour from alphabetic listing
2. Confirm Laminate Manufacturer
3. Read off Pro-Dec Colour and Match Grade

eg: To match Laminex "FLAX" - use "BONE" for an "EXCELLENT" match

LAMINATE COLOUR			PRO-DEC COLOUR
FLANNEL	C	1	MORNING GREY
FLAX	L	1	BONE
FLAX	W	1	MARL BEIGE

The colours selected have been chosen as best under subdued natural lighting conditions. In instances where more than one colour appeared suitable, the colour appearing best under "daylight" fluorescent lighting has been chosen

It should be noted that colour perception is very subjective and varies significantly according to:

- from person to person
- the type and amount of light (ie indoors/outdoors or incandescent/fluorescent)
- the surface reflectivity (ie matt, gloss or satin finish)

If you are selecting for a colour-critical application, it is recommended that you ask us for samples prior to ordering

- This information is provided by Pro-Dec Products Pty Ltd as a courtesy to customers to assist in the selection of product colours.
- This table has been compiled using information supplied by the Laminate manufacturers and distributors. While all care possible has been taken in tabling this data, Pro-Dec Products accepts no liability for any inaccuracies, omissions or currency of information contained herein.
- The information contained herein may be freely distributed provided that:
 - where the information is photocopied or otherwise duplicated, it be done so fully, including this page
 - where the information or format has been substantially altered, an appropriate annotation of that fact be included
